

FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE

MNE 201 MADE EASY

1. The social and human science emulate the natural science in the use of scientific method. Ans: Empirical
2. The research in the basic sciences lead through and in engineering. Ans: Applied research, Development
3. Science from latin word Ans: Scientia
4. means a systematic approach to the observation of phenomenon and development of hypothesis, experimentation and theory Ans: Science
5. The word engine in turn derives from the latin meaning innate quality particularly of mental power. Ans: ingenium
6. Engineering used in the for person who operated a military engine. Ans: 1300s
7. In , an engineer was defined as a constructor of military engines Ans: 1325AD
8. The exact origin of the word came from the era where humans applied themselves to skillful inventions Ans: Engineering
9. An engineer is someone who is applying his and knowledge to designing, analyzing and building useful, helpful and functional works. Ans: Scientific, Technical
10. The earliest recorded civil engineer was an Egyptian known as Ans: Imhotep
11. Imhotep was one of _____ officials. Ans: Pharaoh Djoser's
12. _____ was the first person to make use of columns in architecture. Ans: Imhotep
13. _____ designed and build the great pyramid of Djoser known as the Step pyramid. Ans: Imhotep
14. The step pyramid was built in Egypt in about _____ and found at Saqqara. Ans: 2630-2611BC
15. _____ are partly defined as tool designers and users. Ans: Human beings
16. _____ is the application of science. Ans: Engineering
17. Civilization brought miracles into science in the _____, _____, and _____ centuries. Ans: 3rd, 4th, 5th
18. _____ gave the law of planetary motion. Ans: Keplers
19. _____ gave the laws of motion. Ans: Newton
20. _____ uses telescope to discover Jupiter moon in _____ year. Ans: Galileo, 1609
21. _____ created Logarithms, Slide rule. Ans: John Napier
22. _____ invented mechanical computer in _____ year. Ans: Leibnitz, 1673
23. _____ created the first automatic machine, idea of modern computer in _____ year. Ans: Charles Babbage, 1823
24. _____ created electric battery in _____ year. Ans: Alessandro Antonio Volta, 1796
25. _____ gave the foundation of electrodynamics. Ans: Andre Marie Ampere
26. _____ discovered electromagnetic induction in _____ year. Ans: Michael Faraday, 1831
27. _____ discovered inductance and constructed electric motor. Ans: Joseph Henry
28. _____ and _____ discovered telegraph apparatus and morse code in _____ year. Ans: Gauss and Weber, 1833
29. The _____ age didn't end we ran out of stones. Ans: Stone
30. The history of engineering as a profession began with tool and weapon making over _____ years ago. Ans: 150,000
31. The first industrial revolution took place _____ to _____ and focused on textile industry. Ans: 1750, 1850
32. The second industrial revolution focused on _____ and _____ from _____ to _____ Ans: Steam, Railway, 1850 -1900
33. The 3rd industrial revolution focused on _____, _____ and heavy engineering from 1875-1925. Ans: Steel, Electricity
34. The 4th industrial revolution focused on _____, _____ and _____ in the year _____. Ans: oil, Automobile & mass production, 1900-1950
35. The 5th industrial revolution was based on _____, _____ and the post war boom in _____ year. Ans: Information, Communication, 1950
36. The waves of innovation and industrial development is also known as _____, _____, _____, _____ or _____. Kondratiev waves, k waves, long waves, Super cycles or Surges
37. _____ designed the first two wheel vehicle called bicycle in _____ year. Ans: Divisive, 1816
38. What is the full meaning of PWD Ans: Public Works Department
39. PWD comprises of 3 sections namely _____, _____ and _____. Ans: Civil, Mechanical, Electrical
40. NCSIR means _____. It was established in _____ year. Ans: Nigerian Council for Scientific and Industrial Research, 1966
41. IITA means _____. It was established in _____ year. Ans: International Institute of Tropical Agriculture, 1967
42. Kaduna polytechnic was created in _____ year. Ans: 1968
43. Yaba college of Technology is created in _____ year. Ans: 1969
44. NCST means _____ Ans: New Council for Science and Technology
45. NSDA means _____ and it was decree in _____ year. Ans: Nigerian Steel Development Authority, 1971
46. ITF means _____ and it was created in _____ year. Ans: Industrial Training Fund, 1971
47. _____ was created to train Nigerians in the field of engineering in 1973. Ans: Petroleum Technology Development Fund
48. NSTDA means _____ and it was created in _____ year. Ans: Nigeria Science and Technology Development Agency, 1977
49. RMRDC means _____, created in _____ year. Ans: Raw Materials Research and Development Council, 1988
50. _____ was introduced into Nigeria with the colonial administration of the country. Ans: Engineering Practice
51. During the year _____, the first professionally qualified engineers were produced locally. Ans: 1960's
52. COREN means _____ and it was setup by law in _____ year. Ans: Council for the regulation of engineering in Nigeria, 1970

53. NSE means _____. It was founded in _____. Ans: Nigeria Society of Engineers, 1958
54. _____ is the National umbrella organization for the engineering profession in the country. Ans: NSE
55. There are 7 grades of membership namely _____ Ans: Fellow, Corporate Member, Associate, Graduate, Student, Corporate film, Honorary fellow.
56. The highest policy making body in the society is the _____. Ans: Council
57. The _____ is the head of the council Ans: President
58. _____ is the engineering theory and applications in agriculture Ans: Agricultural Engineering
59. _____ designs and construct physical structures and infrastructures Ans: Civil Engineering
60. _____ does research, design and development of electrical system and electronic devices. Ans: Electrical and Electronic Engineering
61. _____ research, design, and develop physical or mechanical system such as engines. Ans: Mechanical Engineering
62. _____ is the exploration, extraction, and processing raw materials from the earth Ans: Mining Engineering
63. _____ research, design, develop and use materials such as ceramics and nanoparticles Ans: Material engineering
64. _____ is an effective venture that fabricates and arrange information as testable clarifications and expectation about universe
Ans Science
65. _____ is the use of arithmetic, logical, financial, social, and viable learning with a specific goal. Ans Engineering
66. _____ is the accumulation of abilities, routines and procedures utilized as part of creation of product. Ans Technology
67. Graduates of Baccalaureate level Engineering Technology (BET) programs are called _____ Ans Engineering Technologist
68. Graduates of associate degree (AS) program in engineering technology are called _____ Ans Engineering Technicians
69. _____ are the most theoretical of the team members which have earned doctorate in engineering Ans Engineering Scientist
70. Most Baccalaureate level Engineering Technology programs are accredited by _____ Ans EAC/ABET
71. _____ apply engineering and scientific knowledge combined with technical skills to support engineering activities.
Ans Engineering Technologist
72. _____ work with equipment, primarily assembling and testing component parts of devices or systems that have been designed by others. Ans Engineering technician
73. _____ obtain skill training in a field of specialization with less emphasis on scientific or mathematical principles
Ans Vocational Technicians
74. _____ is an occupation in which an individual uses intellectual skill based on established body of knowledge and practice to provide a specialized service in a defined area. Ans Profession
75. _____ is the collection of man made or induced physical objects located in a particular area or region.
Ans Engineering Profession
76. In Nigeria, we rely on _____ and _____ from British Standard Institute and American National Standard Institute both for the training and professional practice
Ans Codes and Standards
77. _____ is a system of moral principles by which human actions and proposals may be judged good or right or wrong. Ans Ethics
78. Engineers are categorized into 2 namely _____ Ans Researchers & General Engineers
79. The importance of engineering are related to 6 key areas namely _____ Ans: Agricultural, Banking, Automobile, Educational, Marketing and Health sector
80. The _____ determines the process, techniques, tools, and team roles and responsibilities for a specific project.
Ans: Risk management approach
81. The _____ describes how risk management will be structured and performed on the project Ans: Risk management plan
82. The _____ support implementation and execution of program risk management in system engineering programs.
Ans: Risk management tool
83. _____ and _____ shows that the occupations of man during this age were agriculture, shepherding, and hunting.
Ans: Historical records and Bible records
84. _____ is the earliest age of man where man used rocks to achieve his aims for defense shelter and other constructions.
Ans Stone age
85. _____ was the first material used along with wood by man. Ans: Stone
86. The bow drill in various form were not used only for drilling, boring but also for making _____ Ans: Fire
87. _____ was the period when bronze was used in making all weapons, tools and domestic utilities. Ans: Bronze age
88. Bronze is a mixture of _____ and _____ Ans: Tin and Copper
89. _____ was first discovered, mined, melted and used before bronze. Ans: Copper
90. Copper was smelted in _____ before 3000BC Ans: Mesopotamia
91. Both copper and bronze were commonly hardened by _____ Ans: Cold working
92. Egyptians wrote mostly on _____ made of various materials Ans Papyrus
93. The _____ originated a decimal and algebraic system. Ans: Sumerians
94. _____ is used for weighing gold Ans Jewelers
95. _____ was used in making statue and verses Ans: Stones
96. _____ were built with stones for climbing and building high walls and story buildings Ans Ramps
97. Plywood was invented in _____ Ans: Egypt

98. Veneering was practiced at about ____ Ans: 1200BC
99. The chariots and the carts were developed during ____ Ans: Bronze age
100. Welding of iron by hammering in the forge was discovered in the ____ Ans: 7th Century BC
101. One of the simple machines developed during Greek period was ____ Ans: One Wheeled Barrow
102. ____ was used for architectural construction, building and bridges during Roma civilization period.
Ans: Wood
103. ____ was made by a cementation process by melting powdered zinc ore with copper and charcoal. Ans Bronze
104. The Roman used brass is known as Ans: Coinage
105. ____ was used in the form of sheet metal as roofing materials and for making pipes and liming water tanks Ans Lead
106. ____ is used as a solder wire. Ans: Lead

I wish you all success in
all your exams
