THE LIBRARY

WHAT IS THE LIBRARY? This is

an place where information resources

or information materials

are acquired, processed, organised,

packaged and disseminated to meet

the need of information users or

clients.

WHO IS A CLIENTELE

In Library Information Science this

is a word use to describe people

who comes to seek information

in the library.

NOTE: they can also be called

"INFORMATION USERS".

5 major thing that completes a Library

① Acquisition

② Processing

③ Organisation

④ Packaging

⑤ dissemination.

Important
take note
of them.

TYPES OF LIBRARY

① National Library

② Public Library

③ School Library

③ Academic Library

④ Special Library

⑤ Private Library

NATIONAL LIBRARY

This is a library owned by a State or

a country. In this library any publication

done in the country or done outside

the country is expected to be there in

a copy or two.

ELDER PETER AYODELE
OJO-ELEKA

National Library is referred to as the "APEX LIBRARY". Established by Federal Government.

FUNCTION OF NATIONAL LIBRARY

- ① It has the ability and power to supervise what happens in other library.
- ② ~~It~~ coordinate the activities in other library.
- ③ They issue ISBN & ISSN.

* ISBN means INTERNATIONAL STANDARD BOOK NUMBER.

* ISSN means INTERNATIONAL STANDARD SERIAL NUMBER.

These are
⇒ ~~both~~ numbers given to books or magazine of serial publications of people who wants to publish their MANUSCRIPTS. It is very important to get those numbers or else they won't be able to publish their books.

ISBN & ISSN are identifiers that a certain books got published in a certain country.

NOTE: Every country has its own unique ISBN & ISSN number.

PUBLIC LIBRARY

This is a library that belongs to all the member of the public. It is established by the state government.

FUNCTION OF PUBLIC LIBRARY

- ① They ensure they meet the information need of people in a particular state.
- ② They promote culture. They do so by organising seminars, story telling and lots to the public.
- ③ they enlighten the public.

SCHOOL LIBRARY

This is a library situated in schools.

FUNCTION OF SCHOOL LIBRARY

- ① They help both student and teacher with all the resources to meet up with the things ~~they need to~~ curriculum.
- ② They provide story telling section for children.
- ③ they provide supplementary ~~books~~ textbooks.
- ④ they provide books students can read to relax.
- ⑤ they provide materials for teachers.
- ⑥ they enlightens students.

ACADEMIC LIBRARY

This is the type of library found in tertiary institutions such as university, monothenis, polytechnic, colleges of education.

FUNCTION OF ACADEMIC LIBRARY

- ① To meet with academic needs of ~~for~~ lectures and students.
- ② They provide ~~to~~ supplementary textbooks & materials to students.

CELEBRATION (66) OF LIFE

③ They provide reading facilities

FUNCTION OF SPECIAL LIBRARY

④ They provide conducive environment for students to read and relax.

① They make sure to meet up with the goals & objective that led to their creation. Example is "IIT in Ibadan which based on agriculture".

⑤ They make sure they fulfill the mandate of their institution.

DIGITAL & ELECTRONIC LIBRARY

NOTE 8= The key difference between both is that digital library does not allow internet access while electronic library allows the usage of internet.

VIRTUAL LIBRARY

This is similar to electronic library. It is centered based on internet accessibility to know what happens in other countries.

ARCHIVE

This is ~~another~~ a place where you have information materials that has historical value.

NOTE 8= Archives does not spread information.

UNITS IN THE LIBRARY

- ① Administrative sections 8= This is where you find the head of the library.
- ② Acquisitions unit 8= This is responsible for acquiring information materials into the library.
- ③ Cataloging & Classification unit 8= Cataloging is the description of information materials in the library. There are some things to note when cataloging a book;

- ① name of book
- ② name of Author
- ③ Place of Publication
- ④ Imprint.
- ⑤ Edition.

(8)
Classification has to do with assigning special numbers to books.

NOTE 8= The tools used for classification is called "THE LIBRARY OF CONGRESS CLASSIFICATION TOOLS". It originates from "THE USA".

* The Library of Congress classification tools is divided into 2 namely

- ① Library of Congress headings.
- ② Library of Congress Schedules.

NOTE 8= In subject headings we get "SUBJECT TRACINGS" while in subject schedules we get the "SUBJECT NUMBERS".

Also the third tool is the "AUTHOR QUATER TABLE" that is used in the cataloging & classification units to get the author number.

NOTE 8= The combination of both SUBJECT NUMBER & AUTHOR NUMBER gives us "CLASSIFICATION NUMBER".

NOTE 8= Classification number can also be called;

- ① core number
 - ② core mark
 - ③ Notation
 - ④ class mark
- Important

The process of arranging books on the shelf is called "SHELVING".

NOTE 8= Cataloging & Classification units work "BEHIND THE SCENE". It is not expected to be visible to "CLIENTELES".

CELEBRATION OF LIFE

(10)

(4) Circulation units :- This is

the first protocol unit for clientele.

3 major things are done there;

① To make enquiries

② To get registered.

③ Lending & borrowing process.

OPAC :- Online public access catalogs.

NOTE :- OPAC can be use through

3 main ways;

① Access point :- This includes

3 important things namely;

"Author, Title, Subject."

(5) Reference unit :- This unit

contain special materials called

"REFERENCE SOURCES".

NOTE :- The reference Librarian

provides 2 kinds of informat

ions namely;

① Factual information (fact).

② Directional information by

directing clientele to where to find

what they want to know by directing

them to the reference source in the

"REFERENCE ROOM".

(6) Serials units :- This units

contains serial sources.

NOTE :- Information in serial

Publications are more updated than

information you may find in the

Reading rooms or reference unit.

Examples of serial publications

include "JOURNALS", "MAGAZINES"

etc.

(7) AUDIOVISUAL UNITS :- Resource

In this units are more of real objects.

ELDER PETER AYODELE
OJO-ELEKA

(11)
objects that can be found in this unit include Television, record players, video players, monitors, projectors etc.

(8) E-Resources units = This is a unit where clientele gets electronic information either through database or virtual space.

(9) Document units = This unit keeps record of documents no matter how small it is.

(10) Portals units = This is the first unit that clientele meets.

REFERENCE SERVICES

These are activities conducted to provide information to clientele by library personnel. Some reference services include;

(1) Assistance for instruction regarding the use of library including locating the materials on the shelves

~~(2) Assisting clientele~~

(2) Assistance in identifying library resources needed to answer particular questions.

(3) Providing brief or factual answers to questions.

SERIALS

These are information materials or resources that are published at regular interval and are intended to continue indefinitely.

(12) Examples of serials.

- (1) Magazine
- (2) newspapers
- (3) newsletter
- (4) Journal

FACTORS AFFECTING PRODUCTION OF SERIALS

(1) Because of their peculiar contents serials are expensive to produce and therefore they have to be produced according to their relevance.

FACTORS THAT CAN INFLUENCE THE PRODUCTION OF SERIALS

(1) Information needs of clientele. The higher the demand of a particular serial the more the production.

(2) Reputation of the Author. For example: Title, experience, fame.

(3) Reputation of publishers

(4) Subject coverage.

(5) Cost benefit

(6) Editorial board.

(7) Alternate format availability.

(8) Price

(9) Place of publications.

CRITERIA FOR SELECTING ELECTRONIC JOURNALS/SERIALS

(1) The quality of Journal.

(2) Access.

(3) Cost

(4) Support

(5) Legal issue

CELEBRATION OF LIFE

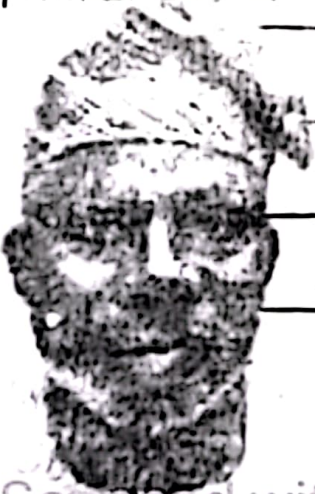

13

ADVANTAGES OF ELECTRONIC JOURNALS / SERIALS

- ① They open fast
- ② They are quicker to use, browse and search.
- ③ Functionality.
- ④ The content of electronic serials are more than print serials.

DISADVANTAGES OF ELECTRONIC JOURNALS / SERIALS

- ① They require special devices to use.
- ② They are more expensive to printed serials
- ③ Shortage of electricity.
- ④ Problem of eye strains.
- ⑤ It is not as comfortable as printed serial

14

⑥ Lifespan of electronic serial is unreliable.

⑦ New technology always require time, money to use.
