

MODULE 6 (PARTS OF SPEECH II)

ADVERBS

An **adverb** is a word that modifies or describes a verb, an adjective, another adverb, or an entire sentence, providing information about how, when, where, to what extent, or how often something happens.

Key Functions and Examples

Adverbs enrich sentences by adding detail.

- **Modifying a verb:** They ran **quickly**.
- **Modifying an adjective:** It was an **incredibly** exciting film.
- **Modifying another adverb:** He responded **extremely** enthusiastically.
- **Modifying an entire sentence:** **Fortunately**, the rain stopped.

Types of Adverbs

Common types of adverbs

- **Adverbs of Manner:** Describe how an action is performed.
 - **Examples:** *quickly, carefully, happily, loudly*
- **Adverbs of Place:** Indicate where an action takes place.
 - **Examples:** *here, there, everywhere, nearby, outside*
- **Adverbs of Time:** Specify when an action occurs.
 - **Examples:** *now, yesterday, soon, later*
- **Adverbs of Frequency:** Tell how often an action happens.
 - **Examples:** *always, never, sometimes, often, daily*
- **Adverbs of Degree:** Show the intensity or extent of something.
 - **Examples:** *very, too, quite, almost, extremely*

PREPOSITION

Prepositions are words that connect a noun, pronoun, or phrase to other words in a sentence to show a relationship of place, time, direction, or manner.

Prepositions are a core part of speech that add detail and clarity to a sentence by indicating connections between different elements. A preposition is almost always part of a prepositional phrase, which includes the preposition itself and its object (a noun or pronoun, along with any modifiers).

For example, in the sentence "The book is **on** the table," the preposition "on" shows the spatial relationship between "book" and "table".

Common Types and Examples

Prepositions can be categorized by the type of relationship they express. A single preposition can belong to more than one category, depending on the context of the sentence.

- **Place/Location:** Indicates where something is located.
 - Examples: *in, on, at, under, above, behind, between, near, beside.*
 - Sentence: "The cat is **under** the table".
- **Time:** Indicates when something happened or will happen.
 - Examples: *at, in, on, before, after, during, since, until.*
 - Sentence: "We will meet **at** noon".
- **Direction/Movement:** Shows how something is moving or which way it is going.
 - Examples: *to, into, across, through, over, toward, up, down, around.*
 - Sentence: "She walked **across** the field".

- **Manner, Cause, or Purpose:** Explains how or why something happens.
 - Examples: *by, with, for, like*.
 - Sentence: "She completed the task **with** ease".

CONJUNCTIONS

Conjunctions are words that connect words, phrases, or clauses to create longer, more complex sentences. There are three main types: **coordinating** (e.g., *and, but, or*), **correlative** (which work in pairs e.g., *either/or, neither/nor*), and **subordinating** (e.g., *because, although, while*). Conjunctions are essential for making sentences flow and expressing relationships between ideas.

Types of conjunctions

- **Coordinating conjunctions:** These join elements of equal grammatical importance.
 - They are often remembered by the acronym **FANBOYS**: **f**or, **a**nd, **n**or, **b**ut, **o**r, **y**et, **s**o.
 - *Example:* "The flower is yellow **and** white." (connects two adjectives)
- **Correlative conjunctions:** These work in pairs to connect grammatically similar elements.
 - *Examples:* *either/or, both/and, neither/nor, not only/but also*
 - *Example:* "**Either** you go, **or** I go."
- **Subordinating conjunctions:** These connect a dependent clause to an independent clause, showing a logical relationship such as cause, time, or condition.
 - *Examples:* *because, if, although, when, since, unless*
 - *Example:* "I am going to the store **because** I need milk."

INTERJECTION

An interjection is a word or phrase used to express a sudden or strong feeling, emotion, or reaction. They are grammatically independent of the rest of the sentence and are commonly used in informal speech and writing to add realism and emotion.

Common Examples and Their Uses

Interjections cover a wide range of expressions. Their meaning often depends heavily on context and tone of voice.

Interjection	Emotion/Function Expressed	Example Sentence
Aha!	Sudden discovery or understanding	Aha! I've found the solution!
Alas!	Sorrow or pity	Alas! The hero died in the end.
Ahem	To get attention or express embarrassment	Ahem , could you please pay attention?
Awesome!	Approval or enthusiasm	You got the job? Awesome!
Ew / Yuck!	Disgust	Ew , I'm not eating that.

Hey!	Greeting or to call for attention	Hey! Look over there!
Hmm...	Thinking, hesitation, or uncertainty	Hmm, I'm not sure about that.
Hooray!	Joy or triumph	Hooray! We won the game!
Oops!	Acknowledging a mistake	Oops! I dropped the glass.
Ouch!	Pain	Ouch! That hurts!
Phew!	Relief or exhaustion	Phew! I made it on time.
Shh!	Command for silence	Shh! I'm trying to listen.
Uh-oh!	Concern that something will go wrong	Uh-oh, I think the bear is inside the house.
Wow!	Surprise or admiration	Wow! That car is amazing.

Yay!	Joy or excitement	Yay! We're going on vacation!

Articles

In English grammar, articles are words that precede nouns to define whether the noun is specific or general. The three articles are "**the**" (definite) and "**a**" and "**an**" (indefinite).

Types and Usage of Articles

Article	Type	Usage	Examples
the	Definite	Used when the noun is specific or its identity is already known to the reader/listener . It can be used with singular, plural, and uncountable nouns.	<i>The</i> sun is bright. <i>The</i> book I read yesterday was good.
a, an	Indefinite	Used when the noun is non-specific,	

general, or is mentioned for the first time. It is only used with singular, countable nouns.

Key Rules for "A" vs. "An"

The choice between "a" and "an" depends on the **sound** of the word that immediately follows the article, not the spelling.

- Use **"a"** before a consonant sound:
 - *a* box, *a* dog
 - *a* university (sounds like "you-niversity")
 - *a* European trip (sounds like "you-ropean")
- Use **"an"** before a vowel sound:
 - *an* apple, *an* elephant
 - *an* hour (the 'h' is silent)
 - *an* MBA (the letter 'M' starts with a vowel sound "em")

Omission of Articles (Zero Article)

In some cases, no article is required. This is often called the "zero article".

- **Generic nouns:** When talking about plural or uncountable nouns in a general sense (e.g., "Cars have accelerators" or "Happiness is contagious").
- **Proper nouns:** With most names of people, countries, languages, and meals (e.g., "John likes French food").

Exceptions include "the United States" or "the Amazon River".

- **Abstract ideas:** When referring to concepts like freedom or education generally.
